

ELTRONG

Overview

Founded in 2007 by IT professionals with tremendous experience in information systems arena, Eltrong, Inc. is a Professional Services and Software Development company that helps organizations stay competitive through the use of advanced technologies and process improvement techniques. Although young, Eltrong has an excellent customer satisfaction list as a result of superior quality of its work. Eltrong constantly strives for long-term strategic alliances with its customers rather than just one-time engagements, and provides the right strategies, solutions, services, and products to help its clients succeed in digital economy.

The team at Eltrong believes that customers deserve a solution tailored uniquely to their specific business requirements. Our knowledge of technology and business allows us to use "best-of-breed" software and components to build solutions that give sustainable business advantages. We focus on fast delivery of the core requirements; this gives a quick jump for the businesses and allows them to be in the driving seat for adding further business benefits.

We provide the most advanced comprehensive, high quality technology, and business solutions available in the marketplace, while measuring our success by that of our customers. We succeed only when customer succeeds.

Solutions

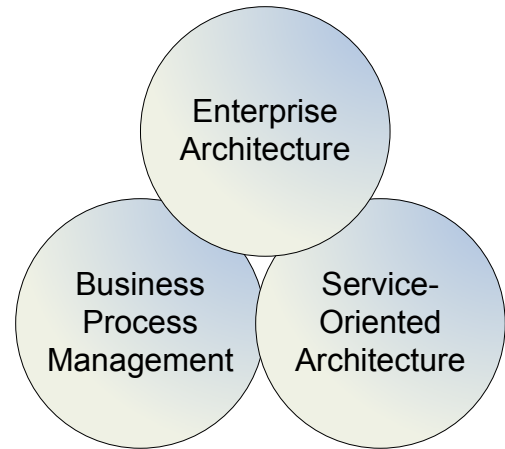

In contemporary economy, companies have to implement the most advanced technology solutions, in order to stay competitive. Without clear vision and vast experience, lacking necessary skills, knowledge and time, companies would never succeed.

Here is where Eltrong can help. Eltrong builds "system from chaos" by providing a complete range of skills, knowledge, and the ability to get the job done on time, within the budget, and to the full customer's satisfaction.
